

ABDULLAH ASHRAF

COMPUTER SCIENCE STUDENT

PROFESSIONAL SUMMARY

Motivated Computer Science student at NUST with hands-on experience in Java, JavaFX, Object-Oriented Programming, and Database Management. Built multiple academic desktop applications focused on problem solving, clean design, and practical software development.

ACADEMIC PROJECTS

Municipal Service & Complaint Management System

- Developed a C++ application for registering and managing municipal complaints.
- Implemented complaint tracking, record management, and user interaction using structs and file handling.
- Currently enhancing the project by converting it into a GUI based application to improve usability and user experience.

Traffic Simulation System

- Created a real-time traffic simulation application using Java and event driven logic.
- Implemented traffic signal handling, lane management, and vehicle movement simulation.
- Designed interactive visualization for traffic flow monitoring.

Pharmacy Management System

- Built desktop software for inventory, billing, and pharmacy record management.
- Implemented CRUD operations with MySQL database connectivity.
- Added medicine search and stock management functionality.

TECHNICAL SKILLS

- C++
- Java
- Python (Basic)
- OOP
- Data Structures & Algorithms
- JavaFX
- MySQL
- GUI Development
- Git & GitHub

EDUCATION

BS Computer Science

NUST

Expected Graduation: 2029

Current Semester: 2nd

KIPS College

FSC Pre Engineering
